

A STUDY INTO THE EXISTING LANDSCAPE WORK IN INTI-IU AND PROVIDED NEW DESIGN AND COSTING FOR THE HARD AND SOFT LANDSCAPE WORK

Prepared by: Shiamala a/p Baniear Salvam

ABSTRACT

The title that I have chosen is **STUDY INTO THE EXISTING LANDSCAPE WORK IN INTI-IU AND, PROVIDED NEW DESIGN AND COSTING FOR THE HARD AND SOFT LANDSCAPE WORK**. The title I have chosen is mainly about landscaping where I mainly need to provide a new design for the existing landscape at INTI-IU to be more better and nicer design than before and also to make the space more useful to the students because as I observed the existing landscape is less used by the student even others .

On the other hand I am also required to provide appropriate costing for the soft and hard landscape work for the proposed new design. Besides providing new design and costing I even collect more information of soft and hard landscape, because to make the new design good and sufficient enough requirement of knowledge needed.

I have design my new design with eight different type of soft landscape and 9 different type of hard landscape so that this could achieve my objective and the expected outcome.

I have also attached the detail information about landscape in my report in chapter 2 .beside that for the costing I measured the space by myself with the help of my friend due to the can be able to get the detail drawing from the B&G department.
