

An Evaluation of Knowledge Management in Private Tertiary Education in Malaysia

Prepared by: Yang Song

ABSTRACT

This research focuses on an evaluation of Knowledge Management in Private Education in Malaysia. Based on the qualitative and quantitative data collected for this research, the author will conduct a reasonable analysis for his own hypotheses testing.

KM area is an interesting area of research due to the big gap that it still has. Despite many researches that have been done in the pass, an agreeable standard is yet to be made. Thus by combining past research findings, a new method or style might come into play. With this in mind not, one would not only benefit from the effectiveness of the KM from this research findings but also use it as a base for any future KM researches.
