

# American course a big hit at Inti

THE American University Programme (AUP) at Inti College remains one of the most successful and popular programmes of its kind in Malaysia.

Since 1998, Inti College has sent the largest number of Malaysian students to the United States, according to the Malaysian American Commission on Educational Exchange (MACEE).

Students continue to choose the AUP at Inti College because it has the most comprehensive programme in terms of the number of courses and majors offered.

Among the diverse majors a student can select are Aerospace Engineering, Architecture, Business Administration, Civil Engineering, Computer Science, Electrical/Electronic Engineering, Information Technology, Management, Mass Communication, Music, Mechanical Engineering, Nuclear Engineering, Pharmacy and Psychology.

Students have an option of a 2 + 2 Degree Programme or a 3 + 1 Degree Programme.

## 2 + 2 Degree Programme

Students can study for two years at Inti College and then

transfer to an American university to complete the final two years.

Currently, 213 American Universities accept credits earned at Inti College, and since April 1997, the college has begun offering third year courses for Business, Computer Science and Engineering in its AUP curriculum.

This arrangement means a significant reduction in cost and very substantial savings for parents and students.

## 3 + 1 Degree Programme

This is another attractive alter-

native, and the number of students signing up for this Programme has increased in recent months.

This programme was designed to provide a less costly alternative for students as they can perform the first three years of their studies at Inti College before transferring to the selected American university for the final one year.

Besides the above programmes, Inti College has Guaranteed Credit Transfer agreements with 19 universities in the USA. Under this arrangement, all the credits earned at Inti College for specific majors are transferable to the specific 19 universities.

The advantage of this arrangement is that even as these universities guarantee the transferability of credits earned towards their degrees, students are not obliged to go to any of them.

Scholarships and merit awards to deserving students are distinguishing features of Inti's educational management.

Students who have scored 6As and above in the SPM examinations or 1A, 2Bs in the STPM
