RECEIVES
TOP SCORES
IN ADVANCEMENT.**

Mr. Kazuo Terakura, President of Fuji Xerox Malaysia congratulating Mr. Tan Yew Sing, President of INTI College.

With Compliments

THE DOCUMENT COMPANY
FUJI XEROX

Already a leading private institution of higher learning in Malaysia, INTI College's recent acquirement of the Xerox 5800 adds yet another milestone to its achievements as the first establishment in the country to own this High Performance Copier, making INTI College far ahead of other institutions of higher learning, and even business corporations. With 3 campuses and its new RM150 million, 55-acre campus at Nilai, it offers a wide variety of Degree programs in Accounting, Business Studies, Computing, Information Technology, Engineering and Law, as well as a Masters in Business Administration program.

All these lead to enormous printing needs, and as demand increased, the college started looking at products in the market with the criteria of cost effectiveness, reliability and high productivity coupled with excellent back-up service.

After looking at many options, Tiffany Cheong, Senior Executive of the college's

Administrative Affairs Department said, "We were impressed with Xerox 5800 because technologically, it was more advanced than any other production copiers available, besides fulfilling the criteria mentioned.

The Xerox 5800, Fuji Xerox's latest high speed departmental copier, introduced only last March, comes with a range of powerful features, including an exclusive advanced capability called Xerox Sixth Sense which allows the Xerox Customer Service Engineer to evaluate the machine from a remote location, determine how well the copier is functioning and identifies the reasons for issues reported. For the user, it means less interruptions, remote verification of machine repairs, swift troubleshooting and expert response to problems. For INTI College, it means

saving on significant time and costs, and smoother work flows.

INTI College is the first Fuji Xerox customer to install 3 units of the Xerox 5800 to handle their document production needs.

A solid indication that INTI College, in its focus on being Positive, Progressive and Productive, is to be rated as one of the best equipped private educational institutions in the country, with not just machines, but Total Document Solutions, today and into the brighter future ahead.
