

Inti expands IT courses

INTI recently signed an agreement with Itbooks Dot Com Sdn Bhd and Wordware Distributors Sdn Bhd. The agreements allow Inti to begin Stage One of a training and certification programme by offering desktop courses which include Microsoft Word, Excel, Powerpoint and Access. Students can certify their learning with a professional exam leading to a MOUS (Microsoft Office User Specialist) certificate.

Inti will also move ahead to Step Two of the programme to certify its students with the A+ and Network+

certifications.

In addition, through the agreements, Inti will also offer the Microsoft Certified Professional qualifications which in turn allow students who complete the required exams to become Microsoft engineers and Microsoft Certified Solution Developers within four months, thus completing Stage Three of the programme.

Inti students now have the option of getting certified at desktop and technical level and have the edge over noncertified employees.
