

A consistent high achiever

20/4/03 s.mai

RAPT attention and group study were among the factors that contributed to the success of Kong Yin Lu of INTI College in Subang Jaya, Selangor.

She has graduated with a First Class Honours degree in Marketing from Britain's University of Hertfordshire and was also the recipient of three previous Excellence Awards.

While she was at INTI, she also managed to win the college's Achievement Scholarship during her foundation years as well as when she was doing her degree.

Although her impressive academic performance was the result of hard work, Kong felt that attending classes alone was not sufficient.

"I also learnt a lot from being active in various college events," she said, citing her involvement in the Student Action Club, Buddhist Society and English Language Society, among others.

An aspiring businesswoman, Kong is currently working as a category buyer with a local hypermarket.
