

Inti-Coventry academy in UK

INTI College sealed another link with its foreign partner, Coventry University – to establish a Coventry-Inti Academy in Britain.

This joint-venture strengthens the existing bond between the two institutions which dates back to 1990. It provides a new mechanism in business development.

With the establishment of the academy, INTI is set to expand its international marketing network and get the opportunity to go beyond existing boundaries to offer its academic programmes to international students.

The academy, located on the Coventry University campus, will provide English Foundation Studies and a one-year programme in Business and IT. Students will also have access to the university's academic and non-academic facilities.
