

Education group Inti Universal Holdings Bhd's share price has fallen by 6.5% in the past three months. The group, which has a total student enrolment of more than 12,000 at its six campuses, reported a year-on-year drop of more than 50% in net profit to RM3.5mil for the first quarter ended March 31 due primarily to a lower intake of new students early this year as many had to go for national service. However, the stock recovered somewhat last month after the company completed its 1-for-4 bonus issue and 1-to-2 share split.
