

Tang Wee Hua's resume includes experience as a research assistant at the University of Kentucky, the US. He is an ADTP graduate of INTI.

# Service beyond the ordinary at INTI-UC

**T**ANG Wee Hua holds a PhD in Electrical and Electronic Engineering from the University of Kentucky in the United States, where he also obtained his undergraduate and master's degrees.

Tang is one of thousands of American Degree Transfer Program (ADTP) graduates from INTI International University College (INTI-UC).

Tang, a former student of Foon Yew High School in Johor Baru, encourages students to further their studies.

"I realise that academic achievement is not everything," said Tang, who obtained the Academic Excellence Award in 1998.

"After my studies, I still have a long way to go as I have plans for a career in Singapore."

But with a resume which includes experience as a research assistant at the University of Kentucky, the future looks bright for Tang.

"I attribute my success to perseverance. The support of my family, friends and INTI faculty also played a major role in bringing me to where I am today."

Since 1992, INTI has placed more students in American and Canadian universities than any other private education institution in Malaysia.

According to the 1999 Annual Report by the Malaysian American Commission on Education Exchange, at least 40 per cent of all Malaysian stu-

According to the 1999 Annual Report by the Malaysian American Commission on Education Exchange, at least 40 per cent of Malaysian students who transferred to the United States were from INTI.

dent students who transferred to the United States were from INTI.

This number is surpassed only by the Malaysian government. Today, more than 8,000 graduates trace their roots to INTI's ADTP.

This year, US universities have awarded more than US\$655,000 worth of scholarships to INTI students, the most for a local private education institution.

Students have long enjoyed options to double major in Engineering and Music, or have a Biotechnology major and a Literature minor.

Everything under the sun, from Food Science to Pharmaceutical Technology, Psychology to Software Systems, is available to students.

At INTI, service goes beyond helping students to obtain credentials as the team of

student-advisors understand that the time spent at INTI could be the most vital of the students' formative years.

While each ADTP student's academic performance is monitored, the same team of advisors will draw up a study plan to ensure maximum transferability of INTI credits to his choice of university in the US. INTI's University Placement Office provides course counselling, reference materials, university placement talks and seminars.

ADTP students can choose from 280 American universities and colleges and still transfer to Canada, Australia and New Zealand should they plan to change their plan.
