

STAR 6/3/2014 : Thursday / Pg. 11 (Education Guide) - News

The content and quality of UOW degree programmes at INTI are identical to those at UOW in Australia.

Enriching learning experience for all

An enriching and rewarding learning experience awaits students of INTI's University of Wollongong (UOW) degree programmes, which are affiliated with a university that enjoys five-star status in Australia, placed in the top 2% of world universities (QS World University Rankings 2013/2014 Times Higher Education World University Rankings 2012/2013 Academic Ranking of World Universities (ARWU) 2013) and listed among the best modern universities in the world.

UOW is rated as a five-star performer in Hobson's Good Universities Guide.

This year marks the 14th year in a row UOW has scored five stars in the "graduate outcomes" category, which included Getting a Job, Positive Graduate Outcomes and Graduate Starting Salary.

Working in partnership, UOW and INTI have extended the best in tertiary education to students in Malaysia through degree programmes in IT (major in eBusiness or Network Design and Management); Computer Science (major in Software Engineering, Mobile Computing, Multimedia and Game Development or Digital Systems Security); Commerce (major in Finance, Accounting, Management, Economics, Marketing, International Business or Public Relations) and Communication and Media Studies (major in Marketing Communication and Advertising).

Students of the INTI UOW programmes are enrolled as UOW students, which grant them access to online resources available at UOW.

These include e-books, e-journals, e-teaching and learning materials.

The graduation certificate is conferred by UOW and bears the name University of Wollongong. As the courses delivered at INTI are identical in content to those at UOW in Australia, students can also choose to transfer at the end of any semester to continue their studies at UOW in Wollongong.

Transfer options available are the 2+1, 1.5+1.5 and 1+2 arrangements. Students may also choose to spend a semester at UOW in Australia with the study abroad option available.

Among the unique platforms for innovative learning and career development in the UOW programme is the annual UOW Technopreneur Week, held in collaboration with INTI's industry partners.

Each year, to promote the entrepreneurial spirit and mindset, students take on the challenge of putting together a creative event

Among the unique platforms for innovative learning and career development in the UOW programme is the annual UOW Technopreneur Week, held in collaboration with INTI's industry partners.

that will enhance their soft skills and prepare them for the real working environment.

As Technopreneur Week is organised by students for students, the participants are empowered via an experience that boosts their level of maturity, confidence and independence, and prepares them for a successful career in any field they may embark on.

Many other initiatives are in place to help INTI's students build up competencies through innovative learning.

Students have undertaken 180 innovative projects with 98 employers from various industries since 2011.

Real employer projects ranging from "Ways of doing business and how to set up a company in Myanmar" to "Development of a research book that identifies the changes shaping Malaysia's marketing landscape and consumer behaviour trends" have been introduced in the classroom to help students develop problem solving, collaboration, communication and critical thinking skills.

About INTI International University and Colleges

One of the most respected and trusted names in the Malaysian private higher education industry, INTI is part of the Laureate International Universities network that spans 30 countries and online, with over 75 accredited universities and 130 campuses, serving nearly 800,000 students globally. Being part of the Laureate network means that on top of what it already offers, INTI provides access to the global resources, best practices, teaching methods, international faculty and management tools that are truly world-class.
