My project report introduces to my project ‘Traffic Controller Electronic ‘Baton’’. It consists of circuit diagram and explanation to the circuit diagram, the construction from the beginning until the end. Including what had I done how I did PCB. Where could I obtain the components and data sheet, how I overcame the problem I met and the sources of reference.

I had placed some photo about my project which shows the actual PCB with component Baton and casing.

At appendix, are some data sheets of IC that I used and schedule.

I had shown my best introduction and explanations in this report.
